Economic advantages

Bilingual people in Wales earn more on average in comparison with people who speak one language.

Educational benefits

Academic research has confirmed that bilingual children can think more creatively and flexibly and tend to score higher in IQ tests than those who speak one language.

1 It's fun!

2 Welsh is a valuable asset in the workplace

3 Over two thirds of the world's population speak two or more languages!

4 Research also determines that bilingual pupils also tend to do better in other subjects at school

5 On average, bilingual children achieve higher English test and exam results than children who speak only one language

Members of St. Francis Catholic Primary School, Pembrokeshire celebrate achieving the bronze award

"It's been a privilege to be part of St. Francis' Criw Cymraeg as we worked toward the bronze award of Cymraeg Campus. It has given me an opportunity to improve my Welsh even further. My favourite part was being given the responsibility of sharing my expertise and experiences with the rest of our school and school community. There is now a strong Welsh ethos in our school and I'm proud to say that I was part of this."

Gabriella Procter, Y6 member of the Criw Cymraeg at St. Francis Catholic School, Pembrokeshire
